

## 4th KIM

# THE 4<sup>th</sup> INTERNATIONAL MEETING AT KÜLTEPE

August 1-4, 2019

## Cultural Exchanges at Kültepe and Surroundings

### from 4th to the 1st Millennium BC

The data obtained during 70 years of archaeological excavations have been presented and discussed at various meetings and conferences. The major aim of the Kültepe International Meeting (KIM) series, which was held for the first time [in summer 2013](#) and takes place every two years, is to generate synergizing interactions among researchers studying the site of Kültepe or the ancient city of Kaneš, and thus to bring together archaeologists and philologists in the scope of multidisciplinary studies, in order to present and discuss their work.

In line with the same objectives, the 4th Kültepe International Meeting (KIM) takes place on August 1-4, 2019 at Kültepe. It gathers the archaeologists and experts collaborating with Kültepe excavations and the philologists who are working on specific archives. This meeting is organized in two sessions:

1. Work in progress in history, philology, art history and all the sub-disciplines of archaeology and archaeometry.

2. Cultural Exchanges at Kültepe and Surroundings from 4th to the 1st Millennium BC: Archaeological and philological data have shown that Kültepe was in close contacts with its neighbors since the earliest periods. The main objectives of this session is to highlight and discuss these interactions that concern not only Kültepe but also the entire area covered by the Assyrian trade network, using both archaeological and textual sources.

## 80 ans du CNRS: À l'école des scribes de Babylone

**4-vingts ans du CNRS et 4000 ans d'écriture : 4 projets, 4 saisons, 4 publics**

**À l'école des scribes de Babylone (1800 avant J.-C.) : écrire en cunéiforme et compter en base soixante**

*Un événement labellisé #80ansCNRS*

L'écriture cunéiforme, bien qu'elle figure sur les médailles du CNRS, est encore largement méconnue. C'est toutefois la première écriture inventée dans l'histoire de l'humanité. Le projet consiste à faire découvrir cette écriture et la civilisation mésopotamienne en animant une « école de scribes » inspirée de celle de Babylone il y a 4000 ans. Les participants seront invités à écrire de petits textes en cunéiforme dans l'argile fraîche et à calculer en base 60, un système dont nous avons hérité aujourd'hui pour la mesure du temps et celle des angles.

Le projet se déroulera en quatre journées – une par saison – et s'adressera à quatre types différents de publics : scolaire en REP, familles, enseignants et habitants de Zone Urbaine

Sensible (Grande Borne à Grigny). Les animateurs sont des assyriologues chevronnés, des post-doctorants et des doctorants du laboratoire Archéologies et Sciences de l'Antiquité (Maison Archéologie et Ethnologie, Nanterre), équipe Histoire et Archéologie de l'Orient Cunéiforme.

### **Dates des animations (2019)**
